Cleaning & Maintenance

exclusive wallcovering

Stains should be removed as soon as possible to eliminate any possible reaction between the staining agent and the wallcovering. Time is especially important for removing stains containing colors or solvents such as ballpoint ink, lipstick, oil and some foods. If the soilant remains on the wallcovering too long, permanent discoloration may develop.

Vinyl wallcoverings should not be sprayed with wax or other protective coatings. Such applications can discolor the material.

Ordinary dirt and smudges can be removed with a mild soap and warm water. Clean from the bottom of the wall upward to protect the baseboard and prevent streaking. Rinse thoroughly with clean water from the top down using a sponge. Blot wallcovering dry with a soft, lint-free towel. For more difficult stains the use of a stronger detergent is recommended. Try an inconspicuous spot first, before attempting the entire wall. Always rinse the wall well after applying a detergent.

Not recommended for cleaning with steel wool or powdered abrasive cleaners. Do not use active solvent-type cleaning preparations, such as nail polish remover, tar and bug removers, etc.
